

JOHN H. LINCOLN.

[To accompany bill H. R. No. 196.]

MARCH 5, 1840.

Mr. STRONG, from the Committee on Invalid Pensions, made the following

REPORT:

The Committee on Invalid Pensions, to whom was referred the petition of John H. Lincoln, beg leave to report :

That they concur in and adopt the following report, made by the Committee on Invalid Pensions, in the 25th Congress :

"That he enlisted into the army of the United States in the month of August, 1813, and was attached to the company of Captain Simeon Wright, of the 30th regiment; that during the latter part of the time of his service, he was employed as one of a fatigue-party to transport provisions from Plattsburg to Champlain by water, in open boats called batteaux; that during the time he was employed in this service, he was greatly exposed, being obliged to lie through nights and storms in the boat without shelter, from which exposure he contracted a rheumatic affection, which, from that period, has disabled him from obtaining his support by manual labor. The petitioner further represents, that the first appearance of the disease was while he was in this service, and that it first manifested itself in fits of severe cramping, and when this subsided the rheumatic affection came on, and which continues to afflict him. His honorable discharge accompanies his paper.

"The services and exposure of the petitioner are satisfactorily shown. It is also satisfactorily proved that he was a well man when he entered the service, and that his disease, believed to have been occasioned by his exposure, as represented, still continues. Medical testimony fixes the degree of disability at three-fourths.

"The committee have come to the conclusion that the petitioner is entitled to relief; and report a bill."
